DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, Figure 1,

Species II, Figure 2

Species III, Figure 3

Species IV, Figure 4

Species V, Figure 5

Species VI, Figure 6

Species VII, Figure 7

Species VIII, Figure 8

Species IX, Figure 9

Species X, Figure 10, and

Species XI, Figure 11

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species I, Claims 10-11

Species II, Claims 10-11

Species III, Claim 10- 11

Species IV, Claim 12

Species V, Claim 12

Species VI, Claim 12

Species VII, Claims 16 and 18

Species VIII, Claims 16 and 17

Species IX, Claim 20

Species X, Claim 20, and

Species XI, Claim 20 and 21

The following claim(s) are generic: Claim 1 appears generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or

corresponding special technical features for the following reasons: fluid transportation of internal combustion engine with a lubricant pump is known in the art itself. Therefore it does not constitute a "special feature" of the invention.
